UVEXPLORER

by UVNETWORKS (USA)

- Automated network map
- Configuration backup
- Network change tracking
- Network monitoring
- Network troubleshooting tools

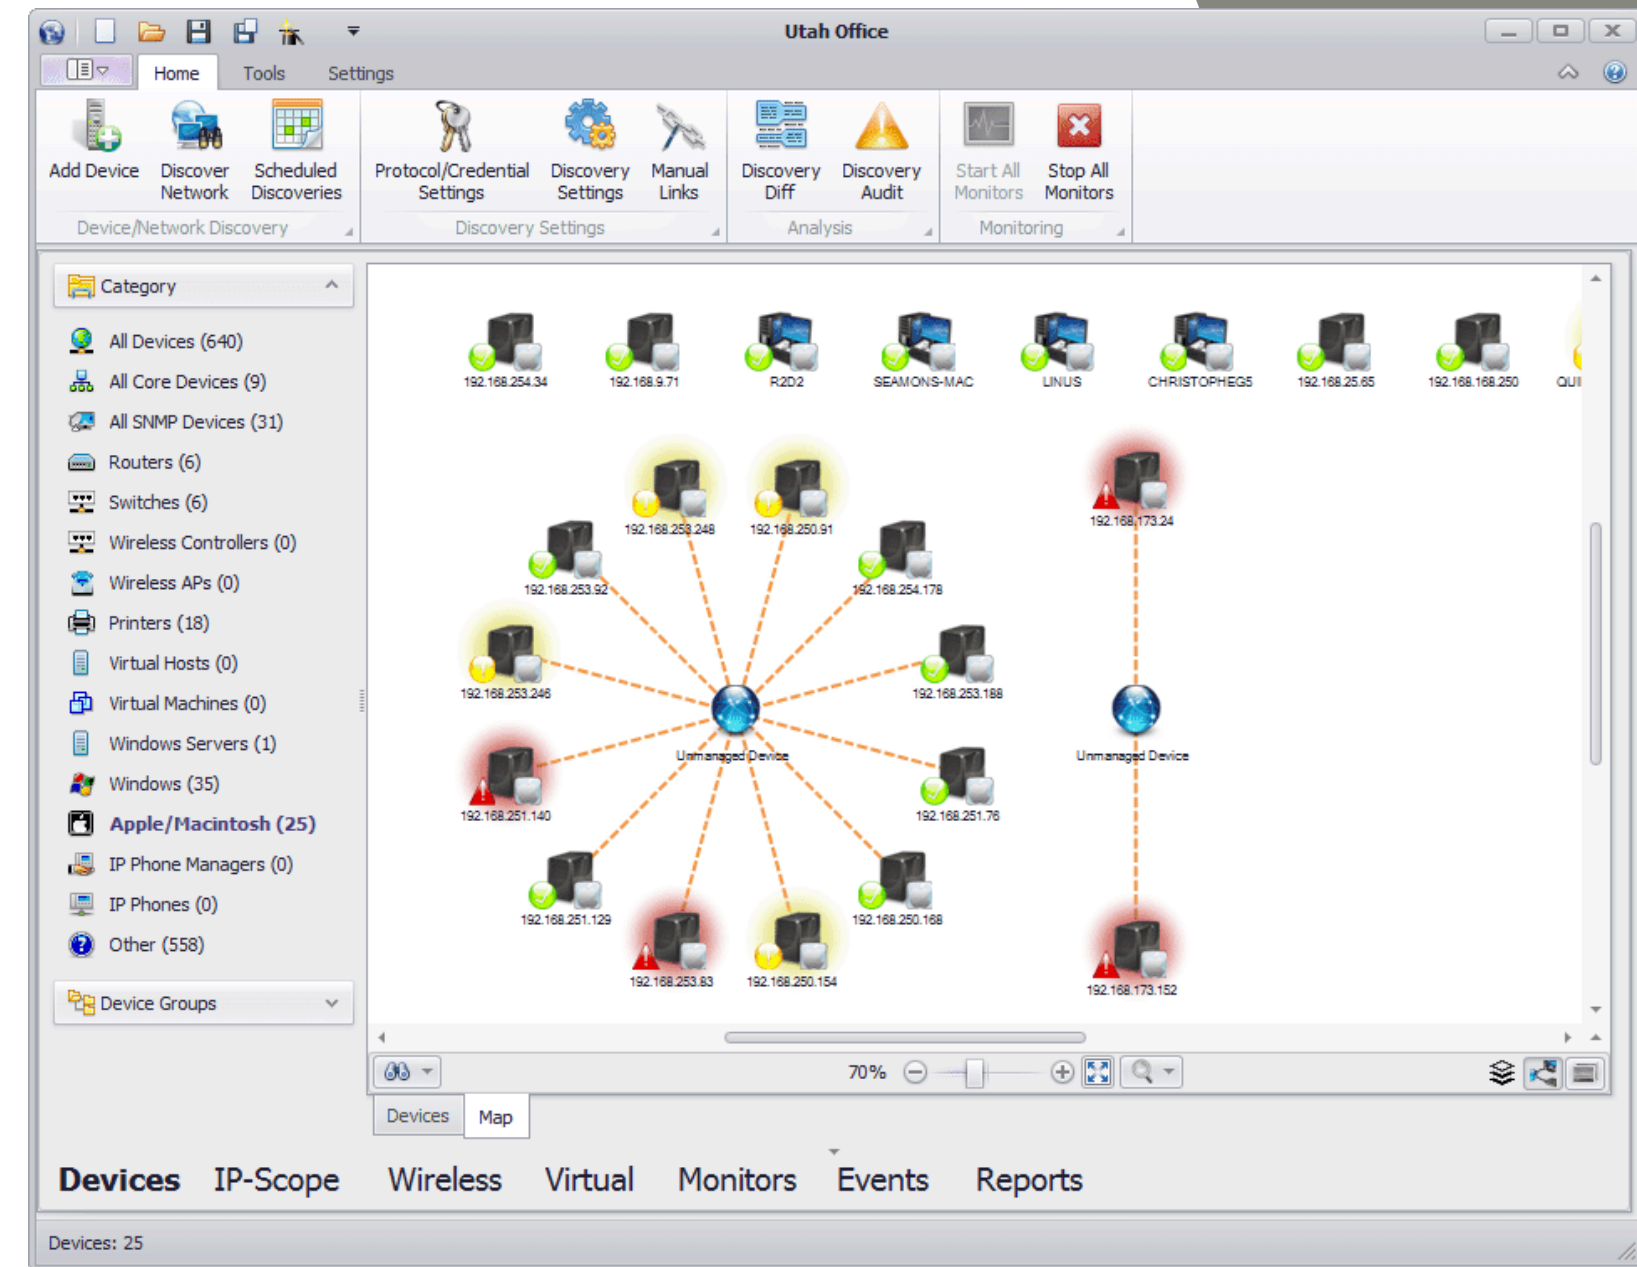

Integrate with PRTG

Paessler recommends using UVexplorer with PRTG

Network Configuration Management

UVexplorer is an on-premise, Windows-based automated network mapping solution that helps network administrators discover, identify, group, track, and troubleshoot their IT infrastructure.

UVexplorer

BDRSUITE

by VEMBU (India)

Backup for Endpoint, Physical Server, FileShare, SaaS, Virtual, Cloud VMs, Applications & Databases

- Endpoint Backup for Windows, Linux, Mac
- Server Backup for Windows, Linux, NAS
- SaaS Backup for Microsoft 365 & Google Workspace.
- Virtual Machine Backup for VMware, Hyper-V, KVM
- Cloud VM Backup for AWS EC2 Instances & Azure VMs,
- Application backup for Microsoft Exchange Server, Sharepoint, SQL Sever, MySQL & PostgreSQL
- Granular file & application-item recovery
- Ransomware Recovery and Ransomware Defense
- Automated backup verification with screenshot
- Ensuring data consistency for Microsoft applications and Oracle
- Instantly boot VMs and physical machines to ESXi host, Hyper-V, and KVM
- Store backup data on local disk, NAS, SAN, Tape, AWS, Azure, Google, Wasabi, and etc.

BDRSuite

Backup & Disaster Recovery

The screenshot displays the BDRSuite web interface for File Level Recovery. The top navigation bar includes the BDRSuite logo and menu items: Data Center, Private Cloud & Endpoints, Cloud Workloads, SaaS Applications, and Applications & DBs. Below this is a secondary navigation bar with options: Backup Server, Data Sources, Backup, VM Replication, Tape Archive, Recovery, and Reports. The main content area shows a progress bar with steps: Choose Host and Restore Type (checked), Restore Version (checked), Restore Options (active), Review & Restore (unchecked), and Backup for Microsoft W... (disabled). The 'File Level Recovery' section is titled with the IP address 127.0.0.1 and the date/time Sep 14, 2023 03:56 PM. It is divided into two columns: 'Select the Files/Folders to Restore' and 'Select Destination Host & Restore Location'. The first column shows a file explorer view for the C:/ drive with a folder icon and a checkmark. The second column contains several settings: 'Destination Host' set to 'This Server', 'Choose Restore Location' set to 'C:/', 'Restore Location' with a dropdown menu, and 'Compression & Encryption' with checkboxes for 'Enable Compression' and 'Encrypt Compressed Data' (both checked). There are also input fields for 'Archive Password' and 'Retype password'. At the bottom, there are buttons for 'Cancel', 'Previous: Restore Version', and 'Next: Review & Restore'.

VEEAM alternative

As one of the most cost-effective backup software options on the market, BDRSuite offers maximum savings of up to 70% for existing Veeam users.

INFRAON

by EVEREST IMS (India)

Infraon, the product brand of EverestIMS Technologies Limited, is an integrated product suite that empowers enterprises and telecom providers to automate, scale, and manage digital transformation journeys.

Infraon Infinity is a fully integrated, modular SaaS product suite, which can be deployed in on-premises, cloud, or hybrid ecosystems. You can start small and scale high and wide without facing any of the hassles of multi-vendor tools.

It is equipped with communication and collaboration workflows that help business users, even non-tech-savvy ones, complete their tasks and make smarter decisions.

Infraon Infinity comes with a single source of actionable data insights, offering features like end-to-end asset management, complete workflow automation, real-time network management, and seamless SLA management.

ARCTIC SECURITY

by ARCTIC (Finland)

Complexity and cost can often make cybersecurity feel overwhelming. Arctic EWS makes it easy and affordable.

Arctic EWS allows you to do exactly that, and the information it provides can often be business critical. The ultimate goal of an Arctic EWS subscription is to achieve an empty monthly report and minimal daily notifications.

With Arctic EWS, you don't need to keep track of any hardware or software and there are no network access concerns – monitoring is 100% external.

Arctic Security

SECHARD

by SECHARD (Turkey)

SecHard provides Complete Zero Trust according to the Executive Office of the President memorandum about Zero Trust, NIST SP 800-207 Zero Trust Architecture, and the Gartner Adaptive Security Architecture.

SecHard Zero Trust Orchestrator is a fully automated software that can perform security analysis and necessary remediations without the need for experts. In this way, companies increase their security levels and have an unmatched return on investment.

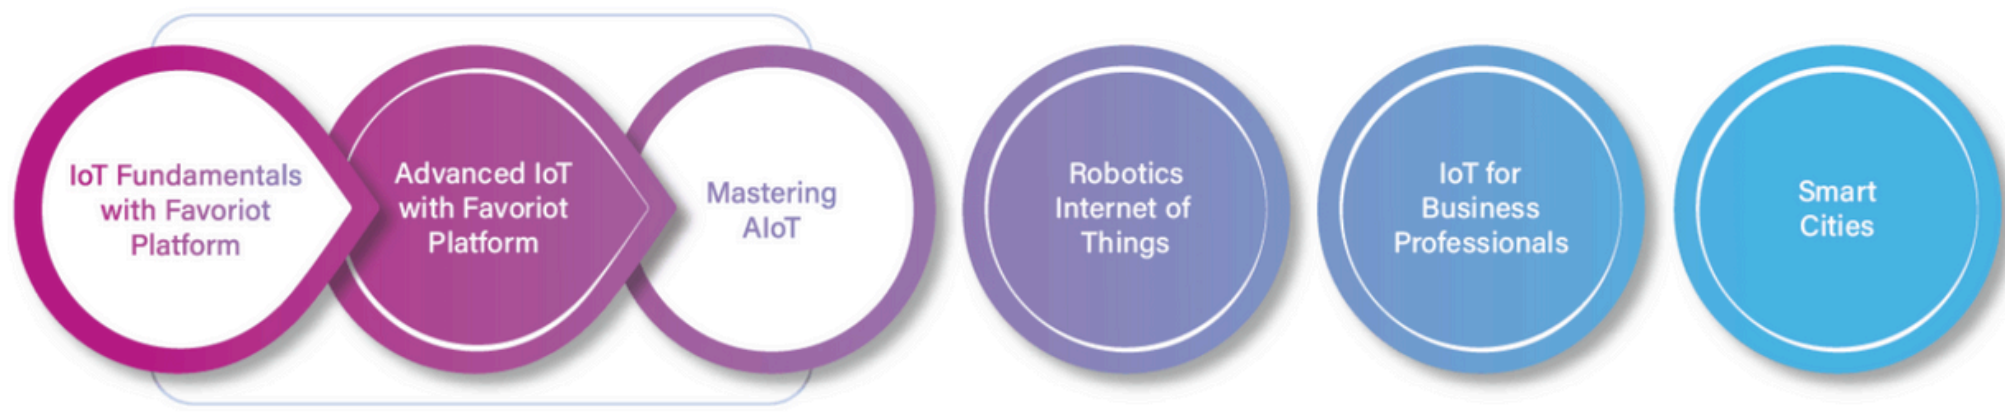

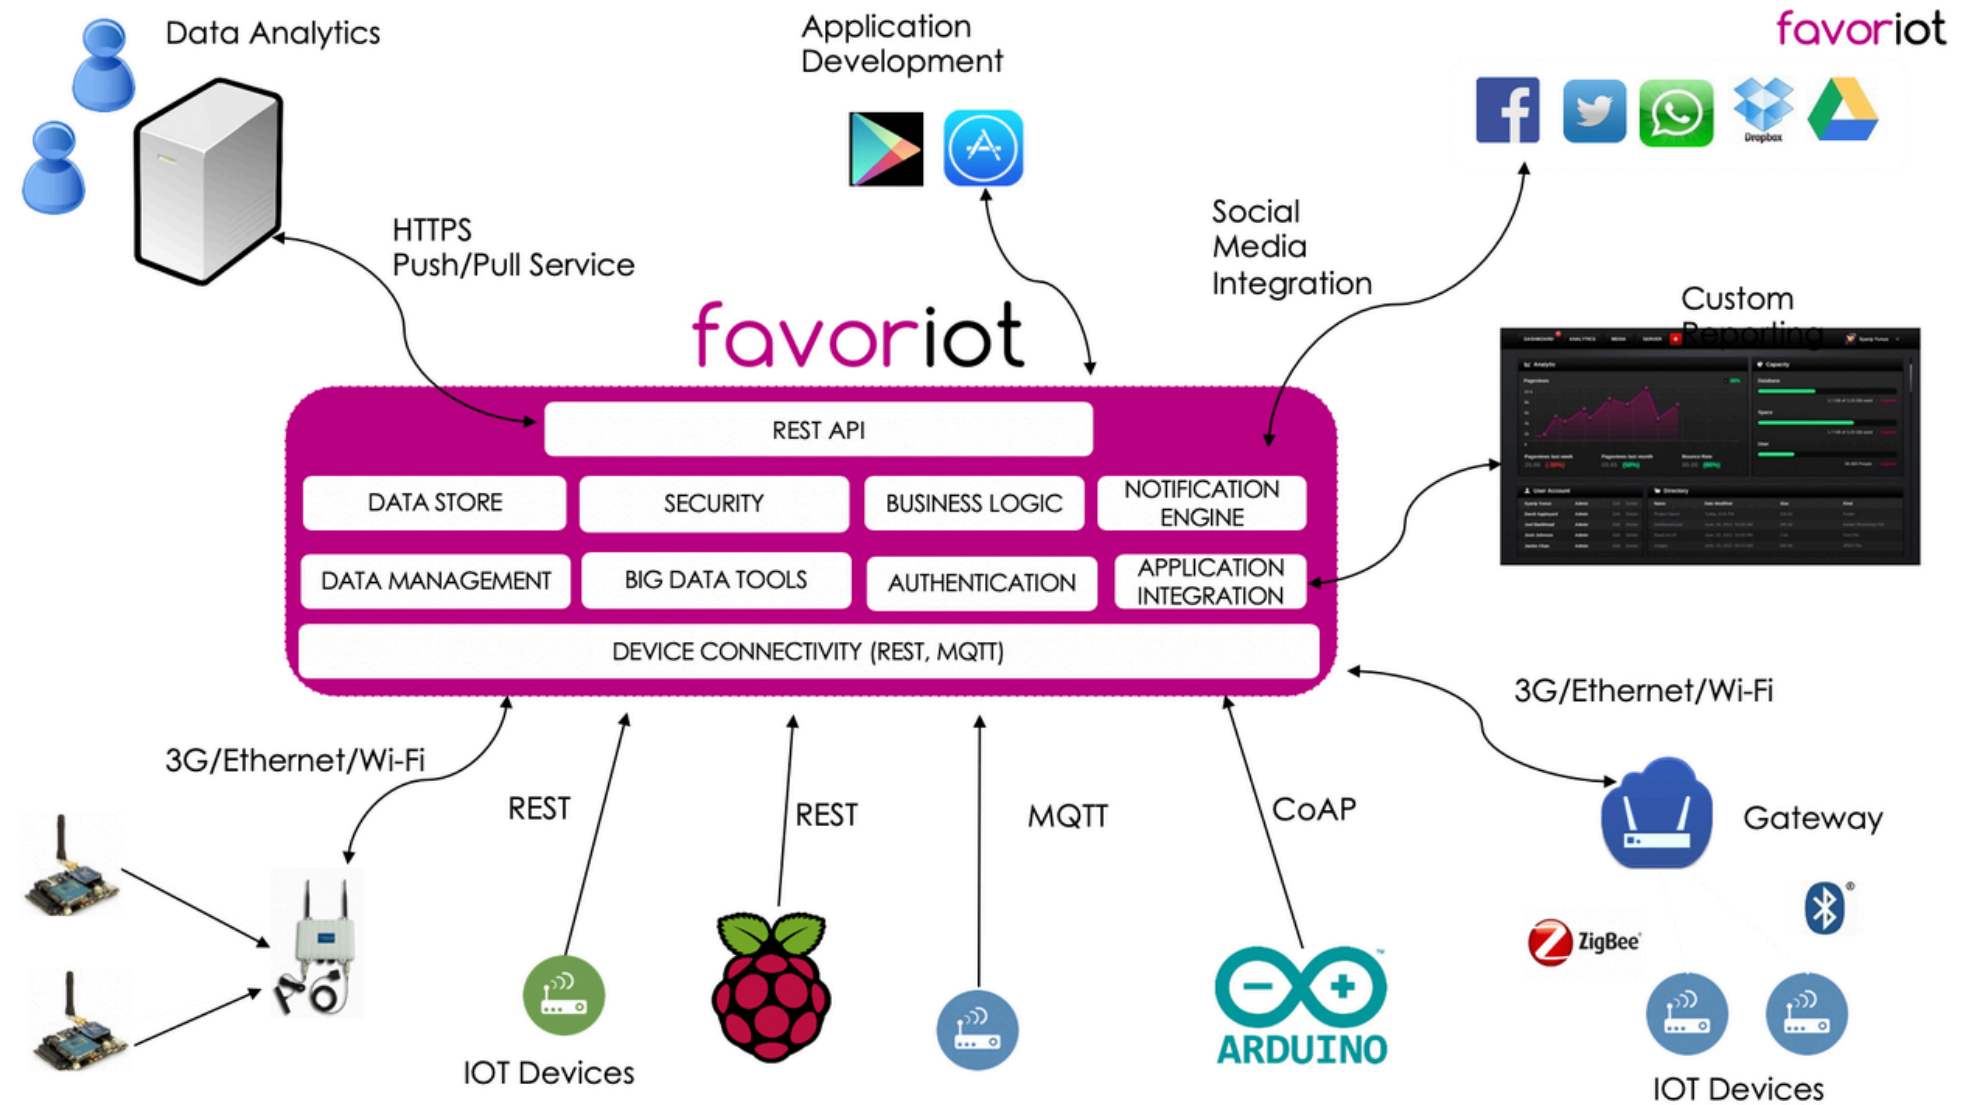

SECHARD
Complete Zero Trust

FAVORIOT

by FAVORIOT (Malaysia)

FAVORIOT offers an IOT platform specifically designed for any Internet of Things (IoT) projects. The platform is developed to support the integration of data from sensors and actuators on the internet. Collecting and storing data from IOT devices become much easier. Moreover, the platform also helps developers in building vertical applications without worry about the hosting.

521 TALENTA

EVENT & TALENTS POOL

521 Talenta adalah platform yang berkomitmen untuk menghubungkan perusahaan dengan talenta IT berkualitas tinggi, serta menyediakan pelatihan intensif bagi individu yang ingin meningkatkan keahlian mereka di bidang pengembangan produk software. Dengan tagline “Talents for Your Product”, kami percaya bahwa talenta yang tepat adalah kunci untuk keberhasilan setiap produk IT.
